The Major Problems in Bangladesh

Now a days Bangladesh is a most populated country in the world. Mainly its population is a very big problem. Besides this there are also many problems such as,

1. Political System and Corruption.
2. Education System.
3. Girls and Women Right.
4. Gender Inequality.
5. Poverty.
6. Unemployment.
7. Traffic Jam.
8. Child Marriage.
9. Economic Growth and Income Inequality.
10. Dowry System.

These are the such a major problem in our country. I would to like to talk about the topic of education system in Bangladesh. Most of the people of our country are illiterate. The rural people don't have any primary education. They don't know about family planning, healthy eating habits. They should change their life style because education empowers, gives choices, and a voice to the disadvantaged. It also promotes health by teaching students about good health practices, and in these ways, it helps to break down the poverty cycle.
